

eMotionMix™

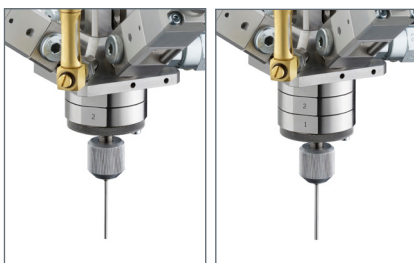

POWERFUL SERVO DRIVE

- **controlled constant rpm
provide constant homogenization
qualities in sensitive
applications**

MODULAR MIXING CHAMBER

- **adaptable for different sizes –
different flow rates**
- **“easy-clean”-concept**

The new eMotionMix is a very versatile dynamic mixing system for the use in bonding, sealing as well as in casting/encapsulation applications.

The mixing chamber is of modular design, so that a range of smaller volumes up to more than 1Liter/min are possible.

The mixer geometry has been optimized to ensure high quality mixing results while keeping shear-heat in the material at a minimum. Also, the mixer can be cleaned without residues with minimum use of cleaning agents.

Through its alternative sealing concepts, eMotionMix can process from low-viscous casting materials to higher viscous sealants.

eMotionMix is ideal for use of materials with extreme mixing ratios or extreme deviations in viscosities.

ALTERNATIVE SEAL PACKINGS

- **optimized for different materials**
- **optional with blocking liquid**
- **longer service life**

UP TO 4 VALVES

- **modular & various sizes**

YOUR GLOBAL PARTNER FOR METERING AND MIXING TECHNOLOGY

- Processing and application of single and multi component adhesive and sealants as well as casting/encapsulation liquids.
- Ambient and temperature conditioned equipment
- Complete systems for manual or fully automatic processes
- Innovative process control and verification

We look forward to discuss further details with you.
