

DYNAMIC SERVO DRIVE

- metering precision
- smart process control (PLC)

The new ContiPro is a two-component metering applicator for the use in bonding, sealing as well as in casting/encapsulation applications.

The metering unit is specifically designed for processing smallest volumes of material with highest accuracy and reproducibility.

ContiPro is ideal for processing abrasive materials or sensitive materials with functional fillers.

The progressive cavity pumps are suited for low- to medium viscous materials.

Through its compact and lightweight design, the ContiPro applicators are ideal to mount on robots.

INLET PRESSURE CONTROL

- for optimal process safety
- highest reproducibility
- allows longer feeding hoses

PROGRESSIVE CAVITY PUMP TECHNOLOGY

- for shear-sensitive materials
- for abrasive materials
- high accuracy for lowest volumes

YOUR GLOBAL PARTNER FOR METERING AND MIXING TECHNOLOGY

- Processing and application of single and multi component adhesive and sealants as well as casting/encapsulation liquids.
- Ambient and temperature conditioned equipment
- Complete systems for manual or fully automatic processes
- Innovative process control and verification

We look forward to discuss further details with you.
