

INTEGRATED CONTROLS

- robot & metering systems integrated in central control
- simple and safe operation and programming

VARIABLE MATERIAL FEEDING SYSTEMS

- optimal feeding and conditioning, depending on material
- 20 l and 200 l RT-Feeders
- material pressure containers

eZbotic™

The new eZbotic is a standardized automated processing cell which is configurable with various metering and mixing system, so that it is always optimally specified for the individual application requirements.

COMES EITHER WITH

Conti Flow Robot
gear metering systems

ContiPro™
progressive cavity metering systems

Vecdos™ Shot Meter System
positive displacement shot meter system

Depending on the material, many different material feeding systems are available.

The meter mix system is fully integrated into the robot system control and thus offers a comfortable, easy and safe programming.

This flexibility allows the use in many different bonding and sealing as well as in casting applications.

FLEXIBLE AUTOMATION

- robot moves applicator to substrate
- robot handles substrate to fixed applicator

OPTIONAL SUBSTRATE HANDLING SYSTEM

- alternating pallet system for minimized cycle times
- we deliver also substrate specific grippers on demand

YOUR GLOBAL PARTNER FOR METERING AND MIXING TECHNOLOGY

- Processing and application of single and multi component adhesive and sealants as well as casting/encapsulation liquids.
- Ambient and temperature conditioned equipment
- Complete systems for manual or fully automatic processes
- Innovative process control and verification

We look forward to discuss further details with you.
